

Planning our water future together

We're working on two important plans that guide how we deliver water and sewer services for our region, now and into the future.

We want your feedback to help shape these plans and ensure we deliver what matters most to our community.

What is our Price Submission?

Our Price Submission sets out:

- What you'll pay
- The level of service you'll receive
- The investments we'll make over a set period

It is reviewed and approved by the Essential Services Commission (ESC).

Your feedback helps shape this plan so we can deliver services that meet community needs and provide value for money.

What is Urban Water Strategy?

Every 5 years, we develop a long-term plan to ensure safe and reliable water services now and into the future. This plan looks at:

- Population growth
- Climate change
- Balancing supply and demand

It also explores options like recycled and stormwater use, and the level of service our customers expect from us as the region grows.

Your feedback helps us plan for the future.
