Sewer maintenance: **upcoming night works**

To provide a safe and reliable sewer service now and into the future, we're upgrading the sewer network in your area. To prepare for this, we need to do maintenance on an existing sewer.

We will modify an existing maintenance hole in the roadway of Wurundjeri Way. From that location, we will then clean, scan and reline a section of 130-year-old brick sewer so that we can then safely upgrade the sewer network. Work crews will monitor and control the flow of sewerage at locations along Flinders Street, Spencer Street and Flinders Lane during work hours, to ensure the work area at Wurundjeri Way is safe. See maps on the next page for location details. This work is being delivered by Abergeldie on behalf of Greater Western Water.

Why work is happening at night

- Reduce disruption to traffic and trams in the busy city environment
- Access the sewer safely while flows are at their lowest.

When will work happen

Early preparation works will begin during the week starting Monday 10 August 2026. Our substantive construction activities will start from **Sunday 16 August 2026** and is expected to continue for around **24 weeks**, pending weather and site conditions. Working hours will be between **9pm to 6am, Sunday to Thursday**.

What to expect

- Work areas at Wurundjeri Way and at any maintenance holes will be set up at the start of each work shift.
- Temporary lane closures will be in place during working hours, with traffic management in place to help navigate our work areas safely.
- Construction activities near Wurundjeri Way such as saw cutting excavation work and using vacuum trucks may be noisy. We will reduce noise where possible by using noise blankets and turning off equipment when not in use.
- Light towers will be used and positioned to point away from nearby windows and buildings.
- There will be no changes to your water or sewerage services.

Need more information?

Thank you for your patience while we complete this essential work.
