Works update – Traffic changes Rockbank Sewer Diversion project

Closure at the intersection of Greigs and Troups Roads

The new sewer main, which runs along Greigs Road in Rockbank, is essential to respond to local growth and provide the community with safe and reliable sewer services.

We are nearing completion of the new Rockbank Sewer Main and have successfully installed more than 1500m out of 1700m of the new sewer.

The final stages of the project involve open trench cutting to connect the new sewer to existing infrastructure, followed by road resurfacing.

This work will require road closures at the intersection of Troups and Greigs Roads.

Changes to traffic

Changes to traffic will include:

- **Troups Road North will be temporarily closed at the intersection with Greigs Road from Thursday 24 October, for around 8 days.**
- During this time, the following local detours will be in place to guide you safely around the area:
 - Vehicles travelling west along Greigs Road will be detoured via Innovation Avenue and Lightsview Boulevard to access Troups Road North.
 - Vehicles travelling east along Greigs Road will be able to turn right onto Troups Road South.
 - Vehicles travelling along Troups Road North towards Greigs Road will be detoured via Lightsview Boulevard and Innovation Avenue to access Greigs Road.
- You may notice other temporary speed reduction and lane closures along sections of Greigs Road.
- To safely connect the new sewer main to the existing network, we need to temporarily shut down the Rockbank Sewer Pump Station. We expect this to happen in late October.
- This work will take place at night to minimise traffic disruption; during this time, you may experience increased truck traffic and odour as we continue servicing the network.
- Please follow all signage and traffic controllers and allow extra time when travelling through the area.

Ongoing works: what to expect

While we make every effort minimise disruption and inconvenience to you, the following will continue to be expected:

- Most of the works will be carried out from 7 am to 5 pm Monday to Friday.
- Some activities will need to be carried out at night in late October/early November from 7 pm to 7 am.
- There may be construction noise and dust from machinery and construction vehicles during working hours.
- Your water and sewerage services will not be interrupted during these works.
- These works will be carried out on our behalf by **Jaydo**.
