Asphalt reinstatement in your area

Victoria Street water main renewal project

Since mid-2022, Greater Western Water and Jaydo Construction have been replacing and renewing over 3.5km of water distribution mains along Victoria Street. Melbourne is now serviced by a new, reliable water supply that will last for many years to come.

What we are doing and when

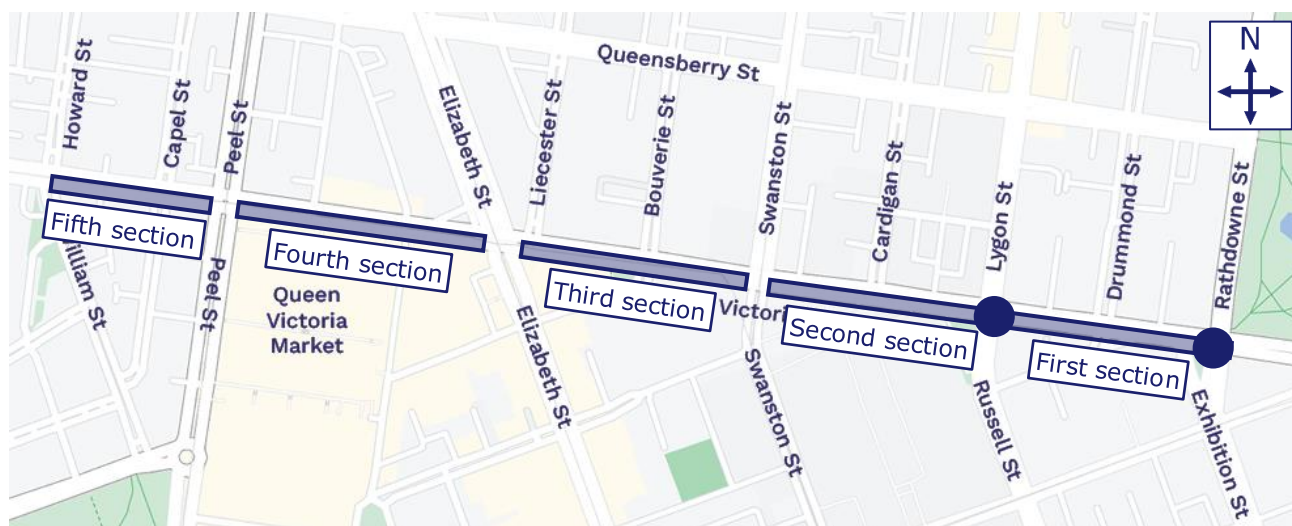

We are about to begin the final section of construction for the Victoria Street Water Main Renewal Project.

Beginning **26 May** for approximately one to two weeks, asphalt reinstatement will take place in block-by-block sections on the southern side of Victoria Street, between the intersections of Exhibition and William Streets.

Asphalt reinstatement will take place at night between **8pm and 6am, Sunday to Thursday**, with around one block of works being completed each night (conditions permitting). Works in major intersections will begin at 10pm to ensure we complete these sections safely and efficiently.

Location of the works

These works will take place in block-by-block sections on the **southern side of Victoria Street** between the intersections of **Exhibition and William Streets**. Traffic management and detours will be in place to help vehicles, cyclists and pedestrians safely move around the area.

 Location of work zones and lane closures that will be in place during construction hours.

 Location of major intersections where works will begin at 10pm.

What to expect

While we will continue make every effort to minimise disruption and inconvenience to you, the following can be expected:

- Noise from profiling and asphalt work with fencing and barricades to keep you safe.
- Dust, noise and lights from machinery and vehicles during construction hours.

Changes to traffic, transport and parking

Please plan ahead as there will be changes to how vehicles and cyclists move between Exhibition and William Streets during construction hours, which includes:

- A full closure of one block per night in the westbound lanes of Victoria Street between the intersections of Exhibition to Russell Streets, Russell to Swanston Streets, Swanston to Elizabeth Streets, Elizabeth to Peel Streets, and Peel to William Streets during construction hours.
- Some changes to bus services during the first and second sections of works for one night each while detours are in place in the major intersections of Rathdowne/Exhibition Streets and Lygon/Russell Streets.

Traffic management teams will be in the area to assist with detours and pedestrian access and to facilitate and access to driveways where possible.

Thank you

We would like to extend a huge thank you to everyone along our alignment on Victoria Street for your ongoing patience and understanding while we have been completing these once in a lifetime works. Victoria Street is now serviced by a new, larger water main that will improve distribution and reliability in the area for another 100 years to come, and will continue to serve your needs now and into the future.
