Siddeley Street sewer upgrade: **upcoming night works**

We're constructing a new sewer pipeline in Docklands to double the capacity of the existing sewer. This upgrade will help us provide a safe and reliable sewer service to Melbourne's growing population.

This project is being delivered by Saunders Aqua Metro on behalf of Greater Western Water.

Site investigation works

Site investigations will take place **intermittently throughout June 2026 for a period of up to five nights at a time**, weather and site conditions permitting. Activities will include non-destructive digging, saw cutting and excavation to safely access existing services and utilities.

- The first round of works will run from **Tuesday 2 to Thursday 4 June 2026**
- Second round of works will run from **Tuesday 9 to Thursday 11 June 2026**
- Third round of works will run from **Sunday 14 to Thursday 18 June 2026**.

Construction activities and timing may change due to weather or site conditions.

Site investigations help us understand ground conditions and verify the location of infrastructure underground. This lowers the risk of service and utility issues during major construction, such as excavation and tunnelling.

Works will take place at the corner of Siddeley Street and Wurundjeri Way.

You can expect to see temporary barriers, trucks, excavators and earth moving equipment. Temporary lane closures will occur at night to facilitate these works. See map overleaf for more details on work area location.

What to expect

- Access to businesses and properties will be maintained at all times.
- All works will occur within a secure work site.
- Temporary detours for traffic will be in place to ensure the safety of the community and our workers.
- Construction noise is expected during works, but we will reduce it wherever possible. Noise from construction machinery and vehicles is expected throughout the night.
- You will see increased truck movements in the area.
- Dust is expected to be minimal. We'll use dust suppression and regular site maintenance to reduce any impacts.

Working hours

Most works will occur **at night** between **9pm and 5am, Sunday night to Friday morning**. Works are scheduled for this time to minimise impacts during peak transport periods and to meet permit conditions.

Why do these works have to happen at night?

Due to the location of the works on Wurundjeri Way, being a major arterial road, the works are required to occur at night to minimise impacts on traffic flow and the surrounding road network.

Map of site investigation works at corner of Siddeley Street and Wurundjeri Way

Signage and on-site personnel will help vehicles, pedestrians and cyclists to move safely through the area.
