

10th OCTOBER 2025

Siddeley Street sewer upgrade

Upcoming works in your area

To provide a safe and reliable sewer service now and into the future, we're constructing a new sewer pipeline in Docklands.

Over recent months, we've completed detailed site investigations. We are now starting **relocation works** from mid-October to move other underground utilities before construction of the new sewer. This will take place at multiple locations. See next page for more information.

This project is being delivered by **Aqua Metro** on behalf of Greater Western Water.

When are we working?

Relocation works are expected to **start from Wednesday 22 October 2025** and will take approximately 6 to 8 weeks at each location.

Working hours depend on the location of works. See next page for more information.

What to expect during relocation works

While we will make every effort to minimise disruption and inconvenience to you, the following can be expected:

- Activities will include **non-destructive digging (NDD)**, **saw cutting**, and **excavation** to safely access and relocate existing services and utilities. You can expect to see temporary fencing and barriers, trucks, excavators and earth moving equipment.
- **Noise** from construction machinery and vehicles is expected.
- **Dust** is expected to be minimal. We'll use dust suppression and regular site maintenance to reduce impacts.
- There will be traffic changes **including lane closures, changes to access and reduced parking**. Signage and on-site personnel will assist vehicles, pedestrians and cyclists to move safely through the area.
- We are committed to maintaining safe and accessible pedestrian routes for all, including those using mobility aids. If access is temporarily disrupted, detours will be clearly marked.

Need more information?

We'll continue to keep you informed as planning and construction progresses. Thank you for your patience and cooperation while we deliver these essential works.
