

April 2025

Upcoming investigations in your area

Spencer Street, Siddeley Street and Wurundjeri Way

To provide a safe and reliable sewer service now and into the future, we're constructing a new sewer pipeline on Spencer Street, Siddeley Street and Wurundjeri Way in Docklands. See map on the next page for more information.

This project will be delivered by **Aqua Metro** on behalf of Greater Western Water.

To prepare for this project, we need to carry out site investigation works.

When are we working?

Investigations are expected to start from **early May 2025** and take up to six weeks to complete across six locations. The works will take approximately one week per location

Working hours will be at night between **7.30pm and 5.00am Monday to Saturday**. We will notify you in advance if there is any change to these working hours.

What to expect during investigations

While we will make every effort to minimise disruption and inconvenience to you, the following can be expected:

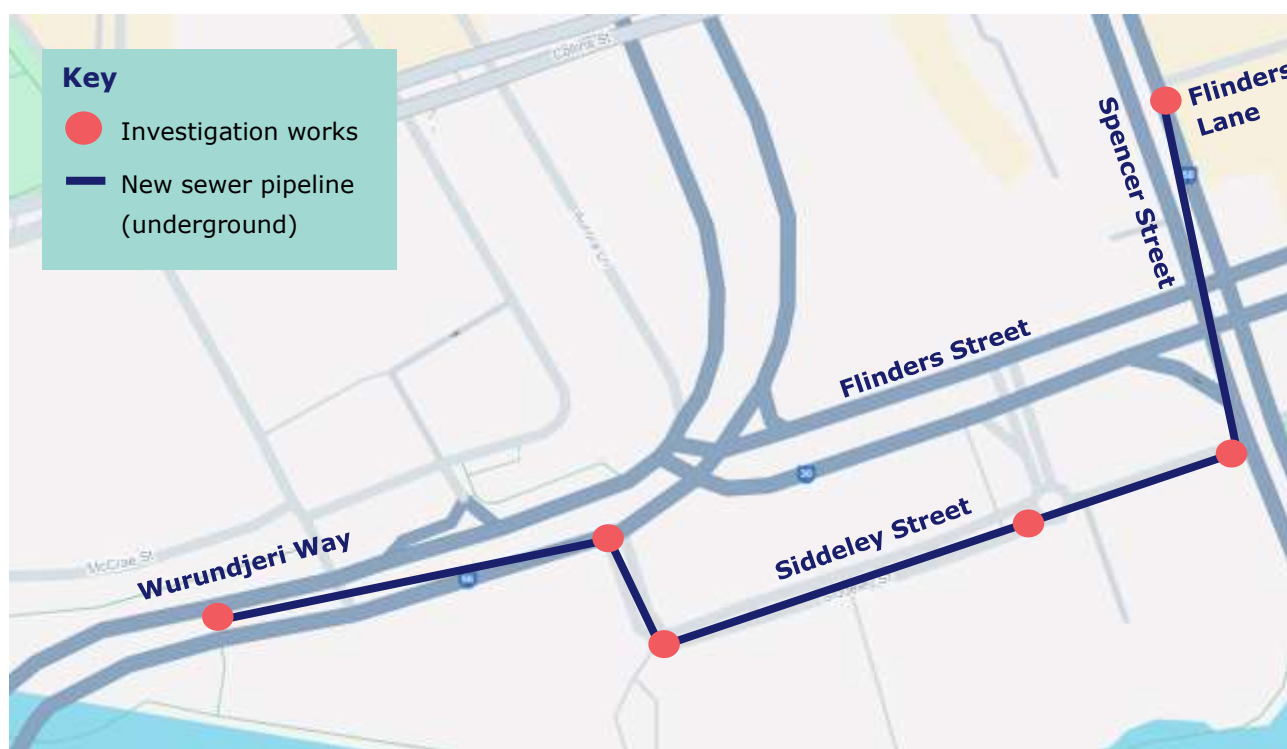

- Activities will include underground investigations and above ground surveying.
- There will be construction noise and dust from heavy machinery and construction vehicles during working hours.
- Noisy activities such as saw cutting will be carried out earlier in the evening where possible to minimise disruption.
- There will be traffic changes including changes to access, lane closures and reduced on-street parking. Traffic management will be on site to help vehicles, pedestrians and cyclists move safely through the area.
- General parking spots around the work areas may be impacted

- Your water and sewerage services will not be interrupted during these works.

Location of works

Works will take place at six different locations indicated on the map below. We may complete works at a few locations at one time.

Need more information?

Thank you for your patience while we complete these essential works. We will provide further information and notification as our planning progresses.

If you have any questions or concerns about the project, please contact us:
